# Before you begin

- It is recommended to use the lower shock mounting holes to raise the chassis to accommodate the body
- It is required to remove the following stock items on the chassis:
  - Cab, bed, rear bumper, front fenders, receiver, lights, fuel tanks
- It is recommended to use the stock rear sway bars to prevent excessive body roll
- Be sure to read through the manual and familiarise yourself with the instructions
- Visualise a plan to assemble all the pieces
- Make sure you have all of the hardware and tools
- Be sure to have enough instant glue
- Dry fit all parts before painting and assembling
- Tip: It will help to paint all of the parts before final assembly
